The lessons from nature have taken over Bulgaria.

In the past couple of months LFN apostles Kamen and Stoyan (TIME Foundation) have travelled across the country to spread the LFN gospel (LFN modules "Waste equals food" and "Multiple benefits"). They have now reached over 127 teachers from over 70 schools, NGOs, outdoor learning centres, etc. They can't wait to get some more feedback from the students, as they are in the process of developing a third, highly philosophical module.

Here are some photos from the town of Veliko Tarnovo
